

### LC Connector Extraction Tool

### Description

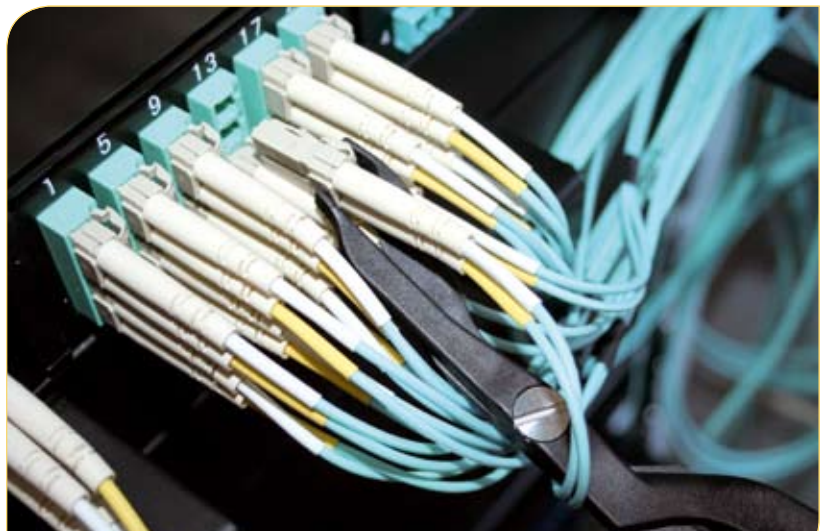

With the ever increasing density of today's active equipment and associated ancillary management Optronics has developed the LC Extraction Tool, designed to allow simple removal of LC duplex, simplex and pigtail connectors. This lightweight, moulded tool has specifically engineered jaws to allow the tool to extract LC connectors in all manner of high density systems. These jaws engage directly with the latching mechanism of the desired LC connector and allow its safe removal without interference of any of the adjacent connectors.

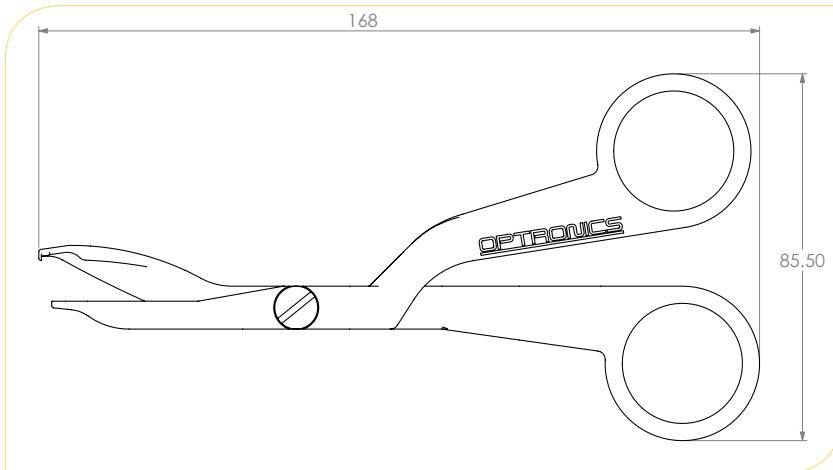

Slim profile slides into densely populated areas

Specificalled engineered jaws easily release connector latch

Jaw retains connector allowing it to be pulled free

### Features/Benefits

- > **Specifically engineered jaws fits all LC connector types**
- > **Ergonomic handle design**
- > **Lightweight, compact design easily fits in the pocket**
- > **Made from high quality robust engineering plastic**

### Applications

- > **High density patching field of LC connectors**

### Technical Specification

PRODUCT SPECIFICATION	
Material	Glass filled PPS
Colour	Black

### Ordering Information

DESCRIPTION	PART NO.
LC Connector Extraction Tool	OPT-LCTOOL
